

OUR BRANDS. OUR OFFERINGS. OUR STORY.

Adapt. Respond. Deliver.

# It's the Company Behind the Machine that Makes a Difference.

Recognized as the leader in fluid truck loading and unloading material handling solutions, FMH Conveyors manufactures, installs and services a complete range of custom engineered and designed conveyors for applications in distribution, manufacturing, assembly, and packaging operations.

Our NestaFlex, MaxxReach, BestFlex, BestReach and BestConnect brands are known throughout the industry for their superior design and functionality. Our products are built to deliver lasting conveyor performance in punishing conditions often associated with shipping and receiving.

We take pride in providing our customers the right product for their application. We go beyond the details of the initial spec to ensure that we understand all the needs so that the equipment solution is the right one for the job. With over 87 combined years of expertise and leadership in material handling, we have a strong, knowledgeable, and highly-skilled team.

FMH Conveyors delivers the exemplary customer service by providing 24/7, 356 day/year support. Whether you need a part shipped or a technician to arrive on-site, we promise to take care of you right away. FMH Conveyors is a Duravant Company.

**NESTAFLEX®**

**BESTCONNECT™**

**BESTFLEX™**

**BESTREACH™**

**NestaFlex is a well known brand** throughout the material handling industry from retail store receiving, to distribution center shipping to packaging lines. It stands for superior design and functionality allowing for complete portability, expansion, contraction, and flexing into curves. Our flexible gravity conveyors improve shipping, transportation and packaging efficiency with its ability to easily move to different locations and positions.

### NestaFlex 200 Roller Conveyors

A light-medium duty, flexible gravity conveyor that is specifically designed to handle odd shaped boxes, bags, drums, and pails in low to medium volume applications.

### NestaFlex Light-Medium Duty 226 Skate Wheel Conveyors

A general purpose light-medium duty, gravity conveyor that is designed to handle multi-sized packages in low to medium volume applications.

Maintain Products

## NestaFlex Heavy Duty 376AL/FL Skate Wheel Conveyors

An extremely durable, heavy duty, gravity conveyor that provides the strength necessary to handle heavy packages in high volume applications. Designed to be adjustable or fixed heights, the adjustable conveyor (AL) uses hand knobs to raise and lower the legs while the fixed leg model (FL) is preset by set screws based on application.

## NestaFlex Heavy Duty 376PL Skate Wheel Conveyors

The leading expandable gravity conveyor for high volume shipping needs that can be equipped with several engineered options including guide track, herringbone transition, and power assist to help enhance ergonomics and productivity.

## FLEXIBLE POWER CONVEYORS .....

**BestFlex is recognized throughout the world** as the brand that saves time and labor and increases overall efficiencies in a wide range of truck loading, unloading and manual sortation applications. BestFlex flexible power conveyors provide the same function and versatility as gravity systems, but with the benefit of powered rollers. By powering the conveyors, any package size can be moved any distance at variable rates of speed. Flexible powered conveyors provide maximum productivity in shipping, transportation and packaging applications where usability and adaptability are needed.

# Solutions for Maximizing Productivity

## BestFlex 1.9 Flexible Power Conveyors

Similar in features to the BestFlex 1.5, this conveyor is designed with heavier duty components. The 16 gauge precision bearing steel rollers are 1.9" in diameter; casters with brakes measure 8" x 2"; aluminum extruded side plates with bolted construction are 2"; and the conveyor can be adjusted from 28½" to 37½" heights. It is engineered for maximum durability to withstand the heavy duty applications.

## BestFlex 1.5 Flexible Power Conveyors

This product offers consistency in its high performance and quality for shipping or receiving hundreds to thousands of packages a day. It comes standard with heavy duty 16 gauge precision bearing 1.5" diameter steel rollers; 6" x 2" heavy duty casters with brakes; 1.59" aluminum extruded side plates with bolted construction; and the conveyor can be adjusted from 31½" to 41½" heights. Designed with a maximum compaction ratio to take advantage of that valuable floor space.

CONVEYORS  
A DURAVANT COMPANY

**MaxxReach has a long history** of supplying the material handling industry with high volume loading and unloading solutions. With its multiple options and diverse capabilities, operators are able to configure the equipment to best meet their specific needs. The MaxxReach telescopic conveyor provides the highest level of productivity for large volume shipping and receiving applications at all types of distribution centers. With its narrow footprint, long reach and cantilevered extension, you stay clear of the floor surfaces and gain valuable floor space. Our state-of-the-art engineered design incorporates quality, ergonomics, and safety into each built-to-order design.

## MaxxReach Telescopic Conveyors

MaxxReach telescopic conveyors are uniquely designed for each customer depending on the specific application. We make sure to spend the time needed to fully understand your application, so that we can design the perfect solution for your needs.

**FMH**  
CONVEYORS  
A DURAVANT COMPANY

**BestReach is an established brand** with a long-standing reputation for quality and reliability. Our rigid conveyor systems are the perfect solution that provide full reach all the way into the trailer from your permanent conveyor system with the highest level of ergonomic benefits and safety controls available in the industry. BestReach belt and roller drive-out conveyors are built tough to handle those heavy volume and high impact shipping jobs that run multiple shifts throughout the day. Belt driveout conveyors provide complete product control with the reliability of the continuous belt surface. Roller drive-out conveyors include accumulation options to maintain throughput with zone-controlled package spacing and to prevent product damage.

### BestReach Rigid Belt Conveyors

Designed to service 53 ft. trailers as well as smaller pup trailers, this conveyor can power in and out of the trailer with no operator effort for improved ergonomics.

Offer More Value

## BestReach Rigid Roller Conveyors

Similar to the rigid belt conveyor, this rigid roller conveyor services 53 ft. and pup trailers, but is specifically designed with accumulation options to allow a single operator to float across multiple dock doors in order to maintain efficiencies.

**BestConnect is the newest brand** in the FMH Conveyors portfolio. Initially designed for E-commerce applications, this product can be easily reconfigured to meet your current or future shipping and receiving needs. The BestConnect system is an innovative reconfigurable conveyor system that can easily link flexible and rigid products together to make loading, unloading and manual sortation faster and more efficient. This conveying system incorporates photo electronics to provide automated flow control giving the user improved ergonomics, reduced labor costs, and improved service life.

30 Degree Merge

MOST  
INNOVATIVE  
AND RELIABLE  
ENGINEERED  
EQUIPMENT

# More than Equipment. A Complete Solution.

## The BestConnect System

The BestConnect system is easily reconfigurable because it moves on 5" x 1 1/2" casters. Each piece is designed as an independent standalone section with its own control panel. Units attach and plug into each other easily and quickly. The BestConnect system can even be added to your existing conveyor configuration with a standard 120VAC power connection. Its modular design allows sections to be added, removed and reconfigured easily with no additional engineering required. It is ideal for startup operations or for facilities that need to increase capacity during seasonal peaks.

**Our commitment is to provide the best** products and the best service. While some products are less complex and may only require a manual or spare parts kit for servicing, others are more sophisticated which benefit from a preventive maintenance program for improved system reliability, long-term use and peace of mind.

### **24/7/365 Technical Support**

Whether it's during the day, in the middle of the night, on a holiday or weekend, we know it's critical when a conveyor goes down. Our technical support staff is available to answer the call and arrange for a technician to be on-site quickly.

### **Field Service**

Our skilled technicians are highly trained and strategically located throughout the United States to assist with emergency situations and scheduled service calls. These technicians are available to support your maintenance activities and objectives to increase productivity, reduce running costs, and maximize equipment availability.

### **Replacement parts**

Replacement parts availability is key to ensuring our conveyors perform around the clock. We have parts covering generations of our conveyors because of their durability and reliability. To ensure reliability, it is important to always use only genuine FMH Conveyors parts as replacements on our conveyors.

### **Preventive Maintenance**

Our preventive maintenance program is more than an investment in protecting an equipment purchase. We create a partnership between the customer and FMH Conveyors that enables us to provide support throughout the entire lifecycle of our products. From preventive maintenance to monitoring spare parts inventory, our mission is to be there before the plant experiences a problem to avoid costly downtime.
