

INNOVATIVE FLEXIBLE PACKAGING

mespack
A DURAVANT COMPANY

Innovative Packaging Solutions Lead to Successful Product Sales.

Specializing in flexible packaging technologies for sachets, pouches and stick-packs, Mespack designs and manufactures film packaging machinery for the food, beverage, pharmaceutical, chemical, confectionery, cosmetic and personal care sectors. Our creative packaging solutions ensure the highest quality presentation, maintain product integrity, extend shelf life and create marketing value.

Mespack technology means high-quality, reliable and efficient solutions that increase production capacity and reduce waste. We design and manufacture machines that are flexible, easy to maintain and meet current safety standards. With over 1,500 machines in service worldwide, Mespack has regional service centers around the globe which are able to quickly source parts and dispatch service technicians.

Mespack is committed to developing eco-innovative sustainable packaging solutions to improve waste reductions, safety compliance and environmental protection plans. Mespack is a Duravant company.

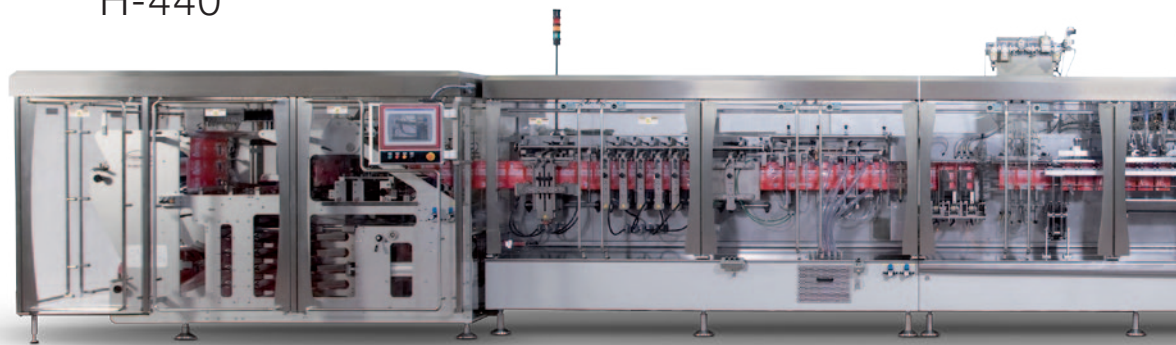

Innovative Flexible Packaging

FORM-FILL SEAL MACHINES

Mespac is the world's leading designer and manufacturer of horizontal form-fill seal machines for food, pharmaceutical, home and personal care, and confectionery. Our machines produce a variety of different shapes and pack presentations, flat or stand-up pouches, cap fitments for easy product pouring, straw attachments for soft drinks and zipper re-closeable systems.

H-440

H-Series Equipment

This new generation of form-fill seal machines incorporates Mespac's latest technology and innovative design. The "H" Program is composed of 16 different machines with configurations suited for multiple products. All machines are of durable and modular construction with user-friendly controls. H-Series modules are designed to be easy to operate and maintain. Our machines are designed to the highest quality standards using automatic controls, servo driven motors and intelligent HMI. A variety of fillers are available, such as augers and volumetric fillers, pumps, weighers and dosing systems. Gas flushing, cleaning systems and sealing options are available.

MODELS
FOR HIGH
PRODUCTION

World Class High Speed Packaging

HCM Series

Fastest HFFS Machine

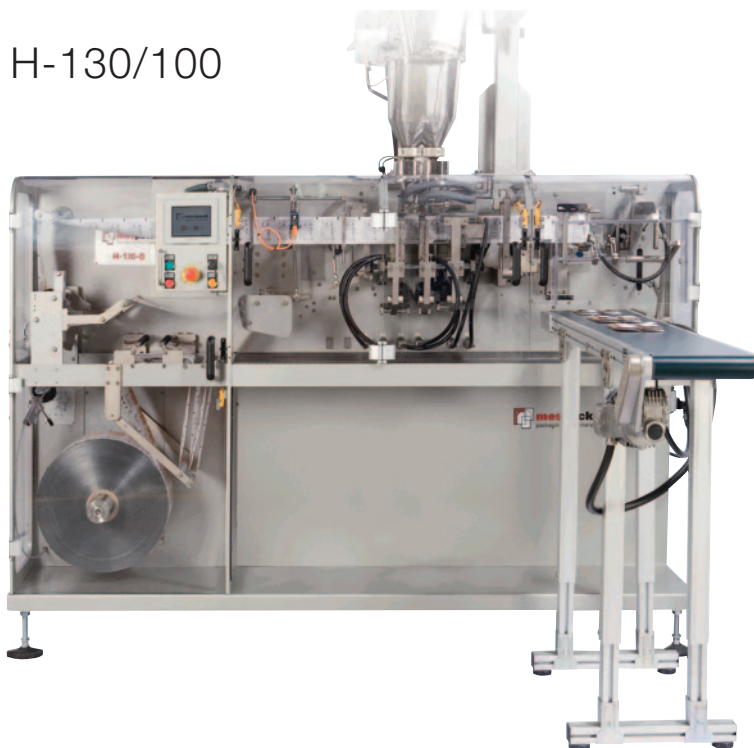

Our HCM 320/420/640 is capable of producing 140 stand-up pouches per minute of 1 liter; this is 60% more production compared with a conventional HFFS machine. The system incorporates a new patented pouch transport system (Mespack Grippers Management System), which enables change-over of the carousel in less than five minutes through the touch screen. The machine can be supplied with all types of dosing systems and accessories.

FORM-FILL SEAL MACHINES

H-130/100

High Technology and Value Solutions

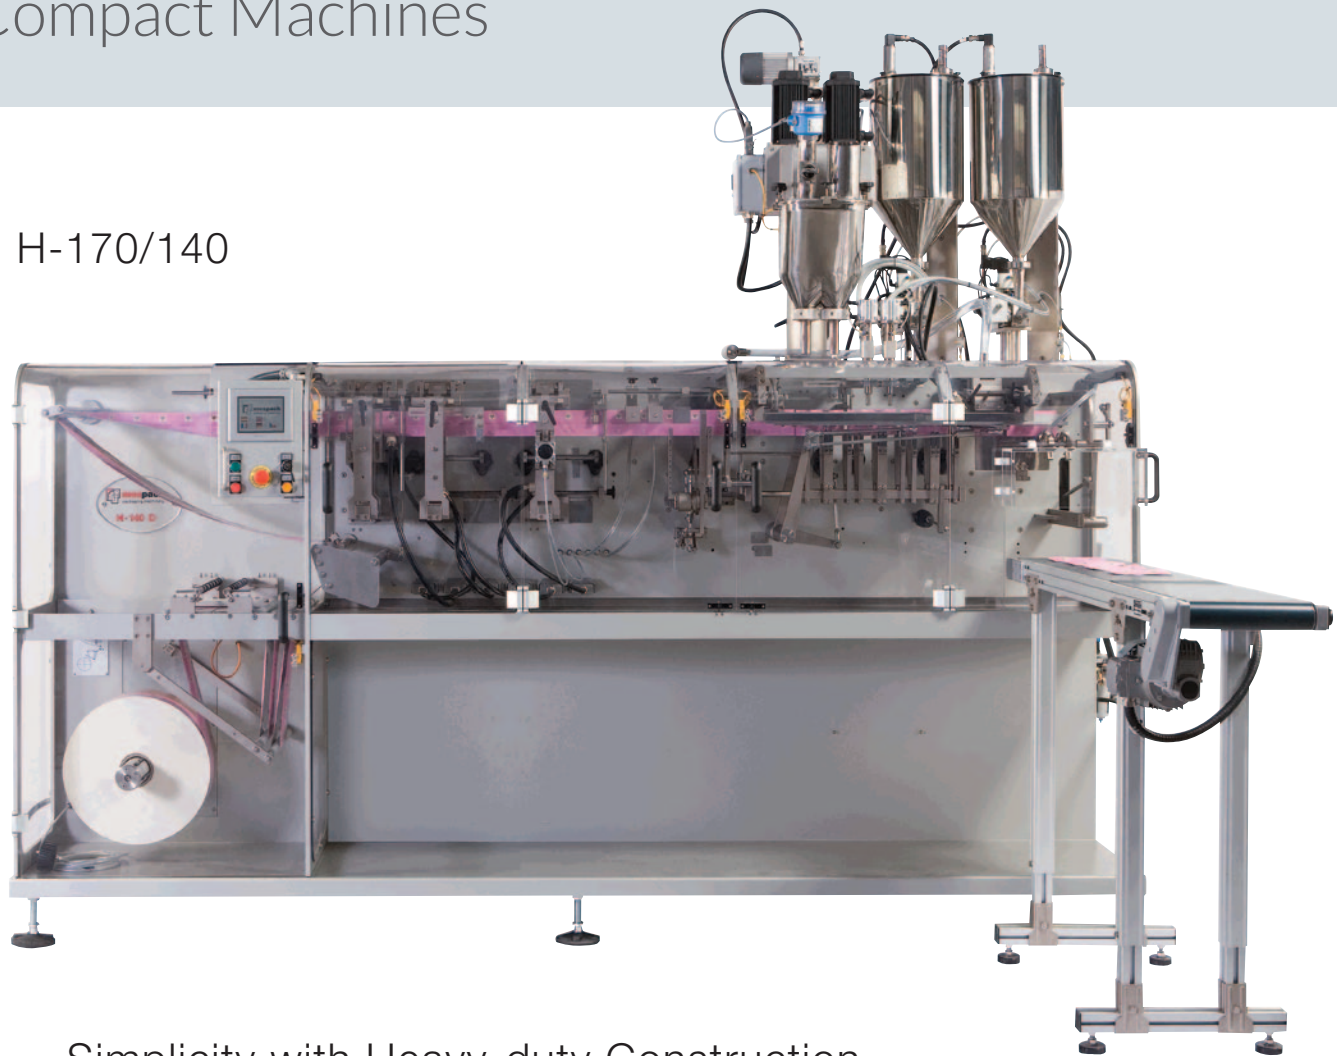

Our H-Series includes machines that are both economical and highly efficient. Our H-100/130/140/170 models are compact and user-friendly. They are designed to be versatile and can produce single, twin or stringed sachets.

USER FRIENDLY
FOR LOW
TO MEDIUM
PRODUCTION

High Speed, Simple, Compact Machines

H-170/140

Simplicity with Heavy-duty Construction

Our equipment is capable of filling larger pouches without the complexity and higher costs of more sophisticated machines. Electrical controls are integrated into the machine frame, which makes the equipment more user friendly.

STICK-PACK MACHINES

Mespack vertical stick-pack machines offer higher reliability with the latest technology. Our high speed stick-pack equipment is ideal for food or diet products, home and personal care, confectioneries, pharmaceuticals and many other products.

MS-600

MS-1000

MS Series

Our MS Series is available in three different models depending on required reel width (600/1000/1200). They are fully guarded and built in a mono-block, heavy-duty steel frame that's easy to access from all sides. Machines can be equipped with multiple dosing system configurations.

ML-1000/1200

Multi-lane ML Series

Our four-side seal vertical multi-lane machine is available between 4 and 12 lanes. It is suited for a multitude of products, granules, powders and liquids and is used in pharmaceutical, food, and home & personal care sectors. It incorporates the newest motion technology with integrated PLC functions which sequences seven brushless motors.

A DURAVANT COMPANY

PRE-MADE FLAT OR STAND-UP POUCH MACHINES

Our equipment can fill pre-made flat or stand-up pouches containing powder, granules, liquid or pastry products. Various models are available to accommodate a variety of pouch dimensions, volumes and capabilities.

SC-Series

Mespac's state-of-the-art SC series machines are fed by a pouch feeding conveyor in one or two lanes; a pick and place to transfer the pre-made pouches to a walking beam system; and the main module where they will be opened, filled and top sealed. Additional equipment options include a full range of coders, hole punchers, notchers, cap fitments, spout applications, multihead weighers as well as various filling systems for powder, granules or liquid and pastry products.

WORK HARDER.

Highly Trained Professionals Experts in Packaging

Pack Design

Mespack offers a wide variety of special packs and designs which will make your products stand out with its own identity. Our R+D team is constantly creating new pack innovations and ideas which we design or jointly develop with our customers.

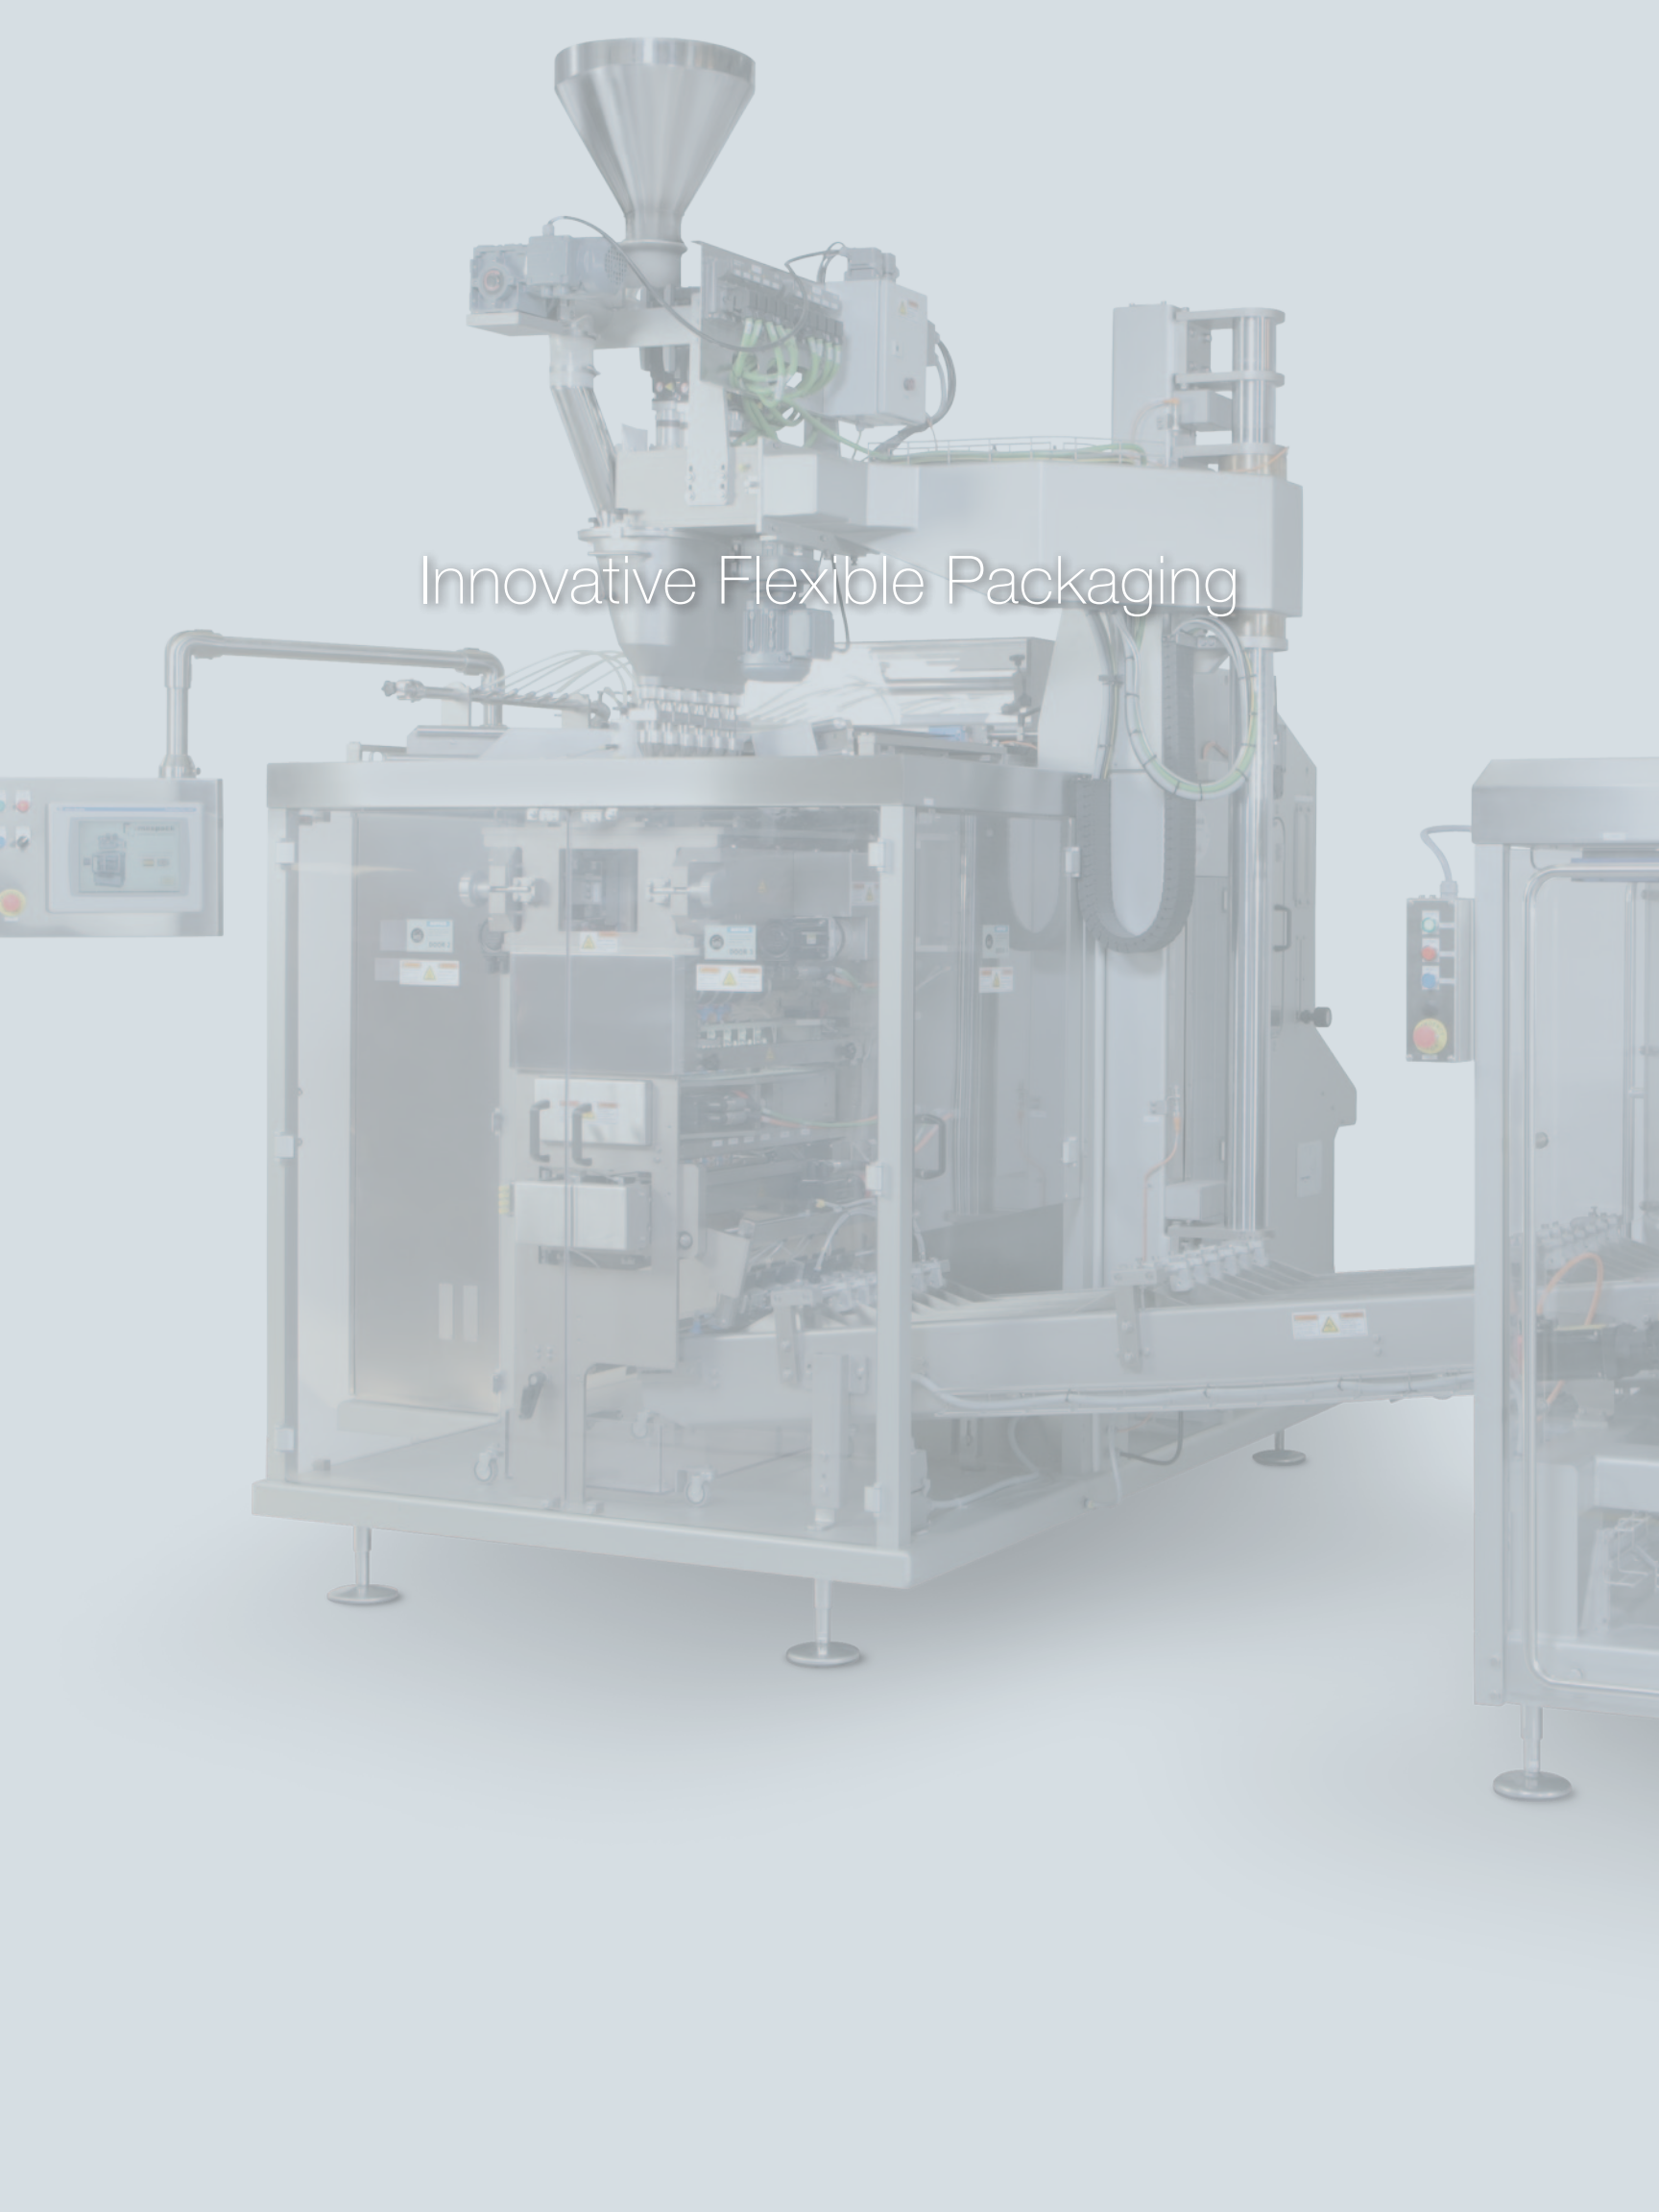

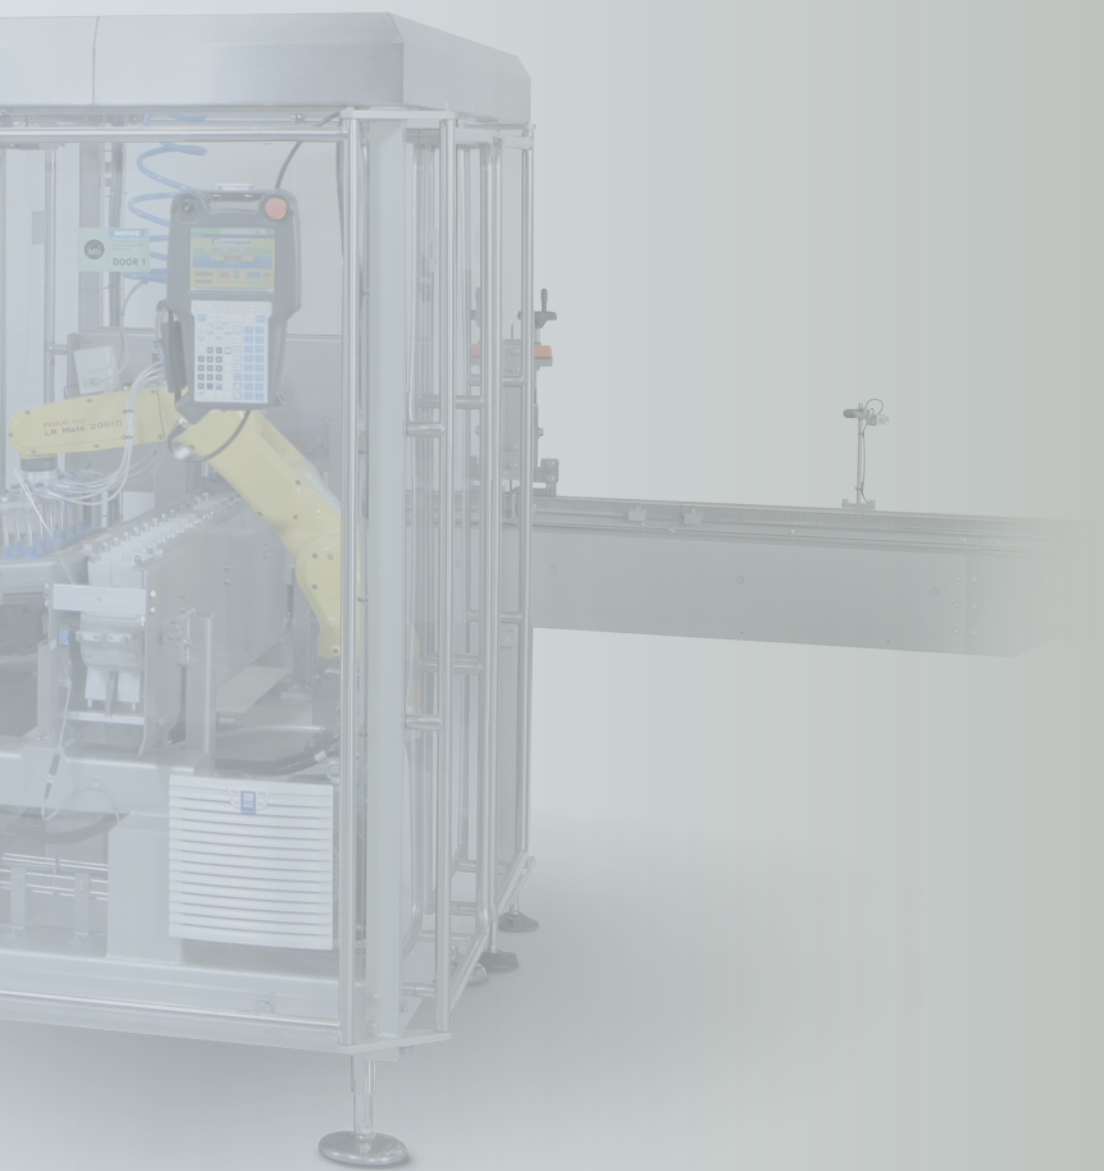

Eco-innovative Sustainable Packaging

For many years, Mespack has been working actively in the development of new machines capable of producing pouches and sachets which result in improved sustainability. We can make your products more attractive to consumers who would prefer recyclable or user friendly packages. These options would result in the lowest possible weight and volume as well as optimize the efficiency in storage, transport and distribution.
